## Testimonials:

I just love the phrase book!!! I've been playing with it all week. It will take some time for the meanings to sink in, but in the meantime, it's fun just to say the words aloud. I will probably write some numbers inside the cover. Otherwise it has everything. You must have been taking careful notes on everything you said on your trips to Italia.

I just went to the Learn Travel Italian website and boy am I impressed! What a wonderful job you and your team have done with everything. I went through the conversational phrases and learned a lot just from that alone. I'll have to check the website every month and see what new recipes are there!

I found your audio files to be of great help. I just returned from Italy where I spent 2 week traveling across the country. Your audio files were very just what I needed in my trip. I am very happy I used the audio files on your website.

The Travel And Learn Italian book helped me tremendously on my trip to Italy. It made my trip easy and was able to interact with people in Venice without any major issues. I highly recommend the book to anyone traveling to Italy.

I just wanted to share with you my experience with your book. My husband is from Italy and his parents don't speak English. So before we left, I purchased a copy of your book and it has been very useful to me. I was so happy because not only could I say a few phrases and sentences but I was also able to understand what they say and sometimes even

contribute to their conversation a little bit.
